

Concept 1: Center Running Bike Lane

What it is:

A two-way separated bike lane that runs down the middle of the street

In/out access to the center bike lane would be provided at each crossing

Change in Driving Travel Time From Rose Hill to Capitol Blvd Bridge (seconds)

	Southbound	Northbound
AM	+20	+29
Mid	+10	+10
PM	+24	+21

*All changes due to new pedestrian crossings

Benefits

- Dedicated space for people bicycling
- Reduced sidewalk riding
- Direct connection to 8th Street

Trade Offs

- May not be as well used as a typical treatment (e.g., regular bike lanes)
- Awkward in/out access
 - Requires a lot of crossings to get in/out of the lane
- There will be a big difference in how fast people are riding down the hill compared to up the hill, which may make some people uncomfortable
- Eliminates boulevard landscaping
- There may not be enough space to make this a comfortable place to ride in certain sections
