The State Highway Access Vision

The State Highway System is managed by the Idaho Transportation Department (ITD)

State Highway 16

- The future local road network interface with SH-16 was completed in 2004.
- At-grade intersections are proposed on SH-16. Intersection signalization and/or upgrade to grade separated interchanges will be evaluated as development occurs.

State Highway 55

- The local road network interface with SH-55 is currently being studied.
- On SH-55, no signalized intersections are anticipated north of Beacon Light Rd. Signalization could be allowed for a maximum of 5 years while interchanges are being designed and constructed.
- Dry Creek Road is planned to be restricted to right-in access only from SH-55 and would be connected to Brookside Lane.

- Interchanges are anticipated to occur at:
  - SH-55 and Brookside Lane
  - SH-55 and Avimor Drive
  - SH-55 and Avimor’s proposed entrance near Spring Valley Ranch

Information provided by the Idaho Transportation Department. If you have additional questions about future access plans for the state highway system, please contact ITD at info@itd.idaho.gov.
