What We’ve Heard
(public and stakeholder input)

Throughout this project, stakeholder and public input has helped to shape some of the key issues to be addressed. Some of the comments received identified support for:

- Alternative “4” as the preferred network
  - 50% of the supporters for alternative “4” also prefer a constrained (speed and volume reducing) connection of Willow Creek Road
- Wildlife and equestrian undercrossings of roads through public lands and open space
- Limiting cut-through travel from the foothills to the State Highway system through downtown Eagle
- Transit routes or other alternative transportation options
- An alternative connection of Willow Creek Road
- Consideration of neighborhood impacts
- Ensuring developers pay for roads
