Future of Willow Creek Road

During the October joint coordination meeting, it was decided to postpone identification of a precise alternative connection of Willow Creek Road. Where the connection should occur will be determined at a later date following the Northwest Foothills Transportation study.

The Northwest Foothills Transportation Study will:

- Analyze a constrained (speed and volume reducing) connection of Willow Creek Road to determine travel demand

- Represent the Willow Creek Road alternative connection as represented in the City of Eagle Comprehensive Plan for travel demand modeling purposes
