

We Heard You

At earlier open houses we consistently heard that residents were worried about impacts to their property and the importance of the trees and landscaping to Kootenai's character.

What We Did

We narrowed the vehicle lanes from 11-foot wide down to 10-foot wide.

This allows traffic calming improvements to fit within the existing street footprint.*

*Any property impacts during construction (sprinkler heads, landscaping, etc.) will be restored.

Please Remember

The traffic calming concept we are presenting is not a final design. If approved by the Commission, ACHD will design the project at a later date. The design will be presented for public comment.
