

# Why Are We Here?

*With the impending development of the Highlands Cove Subdivision both the Ada County Highway District (ACHD) and the City of Boise placed requirements on the developer to help with additional traffic. As a result, ACHD is developing safety options and needs the neighborhood's input.*

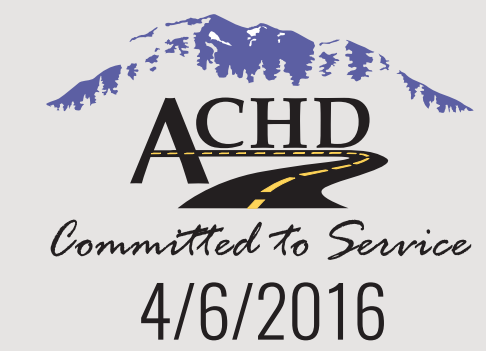

## **Development Requirements**

### *ACHD*

- Provide \$20,000 for traffic calming within Highlands neighborhood.
- Construct median island on Upper Braemere Road to restrict left turns onto Upper Highland View Drive (where the new Highland View Extension will meet Upper Braemere Road).

### *City of Boise*

- Submit a mitigation plan to the City providing at least \$120,000 for improvements in the surrounding neighborhood that direct no more than 50% of anticipated traffic to Highland View Drive.

## **Short term vs. long term options**

- Most of the ideas presented this evening are short term options that could be implemented rather quickly.
- If there is a long term option for a street section, it will be noted on the board.
- Long term options will be examined as part of future joint planning efforts between ACHD, the City, and the Highlands Neighborhood Association, as well as with the North Boise Neighborhood Bicycle and Pedestrian Plan.
