Evaluation Instructions:

Why Evaluate Construction Contractors/Sub-Contractors?

- Scores from these evaluations factor into "Past Performance" ratings that are used to assist in determining contractor selection for future awards.
- Meaningful evaluations help ACHD to provide feedback to Contractors and Sub-Contractors to improve future performance and, thereby, award to the very best contractors.

How to Evaluate Contractors/Sub-Contractors:

- Evaluation forms are available from the Capital Projects, Construction, and Contract Administration.
- When assessing the schedule completion, address ACHD delays, if any.
- Ratings should be based on field notes, observations, and other experience germane to the Contractor/Sub-Contractor performance on the current project.
- Score accurately. A score of four (4) is respectable, however, a score of five (5) is exceptional and should used judiciously.

When to Evaluate Contractors/Sub-Contractors:

- Always complete the Contractor Evaluation Form within a reasonable period of time following the point of Acceptance of Project Completion. All Sub-Contractors with significant project participation, i.e., more than $50,000, should also be evaluated.
