Tools to Aid in Callouts

- Road Weather Information Systems (RWIS)
- National Weather Service
- Ada County Sheriffs Office (ACSO)
- Traffic Management Center (TMC)
- AVL System
- Other On-Call Supervisor
- Open Communication
- Opticom Units
Priority #1 as identified in the policy: arterials, collectors, major intersections, overpasses, bridges, hospitals, fire stations, railroad crossings, school crossings, and streets with grades over six percent (6%).

Priority #2 is for priority School Bus Routes as identified by the public school districts and to support vulnerable populations. Superintendent will decide when to implement.

Priority #3 is for Residential Streets, including cul-de-sacs. Deputy Director will decide when to implement.
2020 Almanac is calling for frequent snow events—from flurries to no fewer than seven big snowstorms from coast to coast. This snow–verload will include storms pummeling Washington state and points eastward across the northern-tier states into Michigan.
NOAA is forecasting that there is a 75% chance that we’ll be in between the El Niño threshold and La Niña through the fall. This means we will be in neutral through the fall, with a 55–60% chance of continued neutral conditions through the spring of 2020.
