**Safe Routes to School**

Kootenai Street has been designated as a Safe Route to School and ACHD wants to encourage and enable more children to walk or bike to school. To that end, ACHD has worked with every public school district in Ada County, and some private schools, to evaluate areas around schools to help identify the best and safest routes, and implement safety improvements.

ACHD has installed a variety of features over the years to make it safer to walk to school, including school speed zone flashing beacons, paths and sidewalks as well as raised curbs, which provide a physical separation between pedestrians, bikes, and motorists.
